

Boston Public Schools

NWEA Response to RFP #EV00007954: Exam Schools
Admission Assessment

Due: June 15, 2020

PRICE PROPOSAL

nwea

Price Proposal

NWEA takes our commitment to our partners seriously. We strive to maintain efficiencies in cost management, giving our partners access to our high-quality assessments and services at the highest possible value.

Over 10,000 educational organizations worldwide have chosen NWEA as their assessment provider, including Boston Public Schools. With an annual retention rate of over 95 percent, NWEA believes the price and value that our assessments and services provide are reasonable to support our partners' unique programs.

Error! Reference source not found. Error! Reference source not found. lists prices for the NWEA assessments and services we are offering Boston Public Schools to support the Exam School Admission Program. We are including our platform, data and standard reports, account management, and support services at no additional cost to Boston Public Schools with the purchase of MAP Growth. Custom reports are available to BPS for an additional fee, to be determined by the District in collaboration with NWEA.

In addition to a dedicated Account Manager, we are offering BPS support from an NWEA Program Manager at 10% FTE during the first six months of the contract. We are also offering Research Consultation services, technical support services, and in-person proctor training to support BPS as the District strives to provide equitable test administration between all testing sites and days. There may be additional fees associated with weekend support and the development of program-specific test administration materials.

Table 1. Prices for the BPS Exam School Admission Program – Year 1
